

Highlights

Among the reported diseases, **AGE** is the leading cause of morbidity in Week 19 with **639 reported cases**.

Overall reporting rate of Week 19 is **100.0%** with **134 out of 134** sentinel sites reporting to EWARS.

This bulletin includes data since January 2022 till date, including comparison of the same period last two year. In May 2019, 36 new sentinel sites (including public hospitals, private hospitals, and medical colleges) were added and was gradually oriented and started reporting. Recently, in November 2024, 17 reporting sites selected from all the provinces of Nepal were upgraded to sentinel sites, thus the number of sentinel sites are increasing. The current number of sentinel sites is 134.

Trend of Outbreak Prone Diseases/Syndromes

Trend of SARI Cases

Comparative Analysis by Disease/Syndrome (Week 19, 2025)

Disease	Week 18, 2025 (Previous Week)	Week 19, 2025 (This Week)	Change in No. of Cases	Week 19, 2024 (Last Year Same Week)
