

Highlights

Among the reported diseases, **AGE** is the leading cause of morbidity in Week 27 with **598 reported cases**.

Overall reporting rate of Week 27 is **95.5%** with **128 out of 134** sentinel sites reporting to EWARS.

This bulletin includes data since January 2022 till date, including comparison of the same period last two year. In May 2019, 36 new sentinel sites (including public hospitals, private hospitals, and medical colleges) were added and was gradually oriented and started reporting. Recently, in November 2024, 17 reporting sites selected from all the provinces of Nepal were upgraded to sentinel sites, thus the number of sentinel sites are increasing. The current number of sentinel sites is 134.

Trend of Outbreak Prone Diseases/Syndromes

Trend of SARI Cases

Comparative Analysis by Disease/Syndrome (Week 27, 2025)

Disease	Week 26, 2025 (Previous Week)	Week 27, 2025 (This Week)	Change in No. of Cases	Week 27, 2024 (Last Year Same Week)
AGE	672	598	-74 ■	608
