

Highlights

Among the reported diseases, **Dengue** is the leading cause of morbidity in Week 44 with **398 reported cases**.

Overall reporting rate of Week 44 is **96.3%** with **129 out of 134** sentinel sites reporting to EWARS.

This bulletin includes data since January 2023 till date, including comparison of the same period last two year. In May 2019, 36 new sentinel sites (including public hospitals, private hospitals, and medical colleges) were added and was gradually oriented and started reporting. Recently, in November 2024, 17 reporting sites selected from all the provinces of Nepal were upgraded to sentinel sites, thus the number of sentinel sites have increased. The current number of sentinel sites is 134.

Trend of Outbreak Prone Diseases/Syndromes

Trend of SARI Cases

Comparative Analysis by Disease/Syndrome (Week 44, 2025)

Disease	Week 43, 2025 (Previous Week)	Week 44, 2025 (This Week)	Change in No. of Cases	Week 44, 2024 (Last Year Same Week)
AGE	206	288	82 ■	339
