Early Warning and Reporting System (EWARS) Weekly Bulletin

(9th Epidemiological Week) 13 March 2017

Government of Nepal Ministry of Health Department of Health Services Epidemiology and Disease Control Division Kathmandu, Nepal ewarsedcd@gmail.com This bulletin includes the updates from the Early Warning Reporting System (EWARS). It includes data since January 2016 till date, including comparison of same period during last year.

Section 1: The Early Warning and Reporting System (EWARS)

Highlights

- Bird Flu outbreak (H5N1) has been detected in a conservation Park, Taltalaiya of Sunsari district (which lies between Itahari and Dharan).Similarly another Bird Flu outbreak(H5N8) has been detected in Pathivara Poultry farm, Itahari Sub metropolitan city ward no 12 of the same district. A team from District Livestock services, DPHO Sunsari, WHO and EDCD has been working for the outbreak investigation, control, and management. No human case has been detected till date.
- Kala-azar: Two cases of Kala-azar are reported this week, one each from Sukraraj Tropical and Infectious Disease Hospital, Teku and Koshi Zonal Hospital, Morang and the cases are from Mugu and Morang district respectively.
- **SARI**: Three deaths from SARI are reported this week, two from Kanti Children Hospital, Kathmandu and one from United Mission Hospital, Palpa. The deceased were from Kathmandu, Jhapa and Gorkha district respectively.
- No case of Dengue and Malaria is reported this week.

The EWARS was established in 1997 to strengthen the flow of information on vector-borne and other outbreak prone infectious diseases from the district to Epidemiology and Disease Control Division (EDCD) and Vector-Borne Disease Research and Training Center (VBDRTC), Hetauda. Rapid Response Teams (RRTs) can be mobilized at short notice to facilitate prompt outbreak response at Central, Regional and District level. They can also support local level health institutions for investigation and outbreak control activities.

This information system is hospital-based and is currently operational in 61 hospitals (out of 82 sites) throughout Nepal (Figure 1). So far, the EWARS mainly focuses on the **weekly reporting** of number of cases and deaths (including "zero" reports) of six priority diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI), and other epidemic potential diseases/syndromes (like enteric fever). It equally focuses on **immediate reporting** (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more cases of AGE and SARI from the same geographical locality in one week period.

Reporting Status

Out of 61 functional EWARS sentinel sites, report was received from 38 sentinel sites (62 percent) whereas 23 sentinel sites did not report in 9th Epidemiological week of 2017. The reporting coverage is same as compared to the previous week.

1.1 Acute Gastro-Enteritis and Cholera

285 cases of AGE are reported in 9th epidemiological week of 2017. Among 285 cases, the majority of cases are from Achham (43 cases), Dolakha (21 cases), Morang (19 cases), Kaski (13 cases), Dhanusha (11 cases) Gorkha (10 cases), Jhapa (10 cases), Pyuthan (10 cases), Doti (9 cases) and Kapilvastu (8 cases) district. The number of AGE cases reported in 9th week this year is same as the number of AGE cases reported in the same week last year (283 cases).

No death from AGE is reported this week. Three deaths from AGE are reported so far this year. Thirteen deaths from AGE were reported in 2016.

1.2 Severe Acute Respiratory Infection (SARI)

216 cases of SARI are reported in 9th epidemiological week of 2017. The cases of SARI reported this week did not exceed the number reported in the same week last year (226 cases). Among 216 cases, the majority of cases are from Jhapa (33 cases), Morang (21 cases), Rupandehi (18 cases), Lalitpur (14 cases), Dhankuta (11 cases), Kathmandu (10 cases), Kapilvastu (7 cases), Saptari (6 cases), Gorkha (6 cases), Gulmi (6 cases) and Dang (6 cases) district.

Three deaths from SARI are reported this week, two from Kanti Children Hospital, Kathmandu and one from United Mission Hospital, Palpa. The deceased were from Kathmandu, Jhapa and Gorkha district respectively.

Twelve deaths from SARI are reported so far this year. Seventy deaths from SARI were reported in 2016.

1.3 Enteric Fever

28 cases of Enteric fever are reported this week, including 6 from Nawalparasi and 4 from Morang, 3 from Lamjung, 3 from Tanahu and 2 from Kaski and Siraha district.

1.4 Malaria

No case of Malaria is reported this week. Two cases of malaria are reported so far this year. Eighty three cases of Malaria were reported through EWARS in 2016.

1.5 Dengue

No case of Dengue is reported this week. Three cases of Dengue are reported so far this year.

1.6 Kala-azar

Two cases of Kala-azar are reported this week, one each from Sukraraj Tropical and Infectious Disease Hospital, Teku and Koshi Zonal Hospital, Morang and the cases are from Mugu and Morang district respectively.

Thirty-five cases of Kala-azar cases are reported so far this year. 150 cases of Kala-azar were reported through EWARS in 2016.

Timeliness & completeness of reporting from sentinel sites:

Site Code	Sentinel Sites	Timeliness (this week)	Completeness (%)	Site code	Sentinel Sites	Timeliness (%)	Completen ess (%)
101	Mechi ZH, Jhapa	On time	100	130	DH, Rasuwa	No reporting	0
